____ Residential ____ Commercial ____ Tenant ____ Owner

Desired Water Meter Size: ____ 3/4" ____ 1" ____ Other(size)

The Utility agrees to sell and deliver water to the Customer and the Customer agrees to purchase and receive water from the Utility in accordance with the rules of the Utility as included in its approved Tariff on file with the Utility and Texas Public Utility Commission (PUC).

All water will be measured by meters which are furnished, installed, owned and maintained by the Utility. The meter and /or connection is for the sole use of the Customer to serve water to one dwelling, business or lot. The Customer shall not share, resell, or submeter water to any other dwelling, business, lot, etc., without the specific written authorization of the Utility and in compliance with applicable laws and regulations.

The Customer grants to the Utility the right to locate a water service meter and the pipe necessary to connect the meter on the property of the Customer at a point mutually agreeable to both the Utility and the Customer. The Customer will allow the Utility access at all reasonable times to its property and equipment located upon the Customer's premises for the limited purposes of reading the water meter,

repairing or replacing existing facilities and the inspection of Customer's facilities to check for illegal connections or unsafe plumbing practices or cross connections, in compliance with the requirements of the Utility's Tariff and Texas Commission on Environmental Quality's (TCEQ's) "Rules and Regulations for Public Water Systems."

The Customer will install, at his/her own expense, a service line from the water meter to the point of use which includes a cutoff valve on the Customer's side of the water meter. The Customer will be responsible for maintenance and repair of the service line. The use of pipes, pipe fittings, plumbing fittings, and fixtures that are not "lead free" as defined by the Federal Safe Drinking Water Act (SDWA) or solders and flux that contain more than 0.2% lead are prohibited for any plumbing installation or repair of any residential or non-residential connection which provides water for human consumption and connected to the water supply. The SDWA defines "lead free" as having a maximum lead content of 0.25 percent.

At locations where the Utility's distribution pressure is greater than 80 pounds per square inch at the service connection, the Customer shall, at his/her expense, properly install and maintain a Pressure Reducing Valve (PRV) per the International Plumbing Code.

The Customer shall hold the Utility harmless from any and all claims or demands for damage to real or personal property occurring from the point the Customer ties on the water meter to the final destination of the line installed by Customer.

The Customer agrees to grant to the Utility an easement/right-of-way for the purpose of installing, maintaining and operating such pipe, meters, valves, and any other equipment which may be deemed necessary for the provision of Utility Service to that Customer. The Utility will attempt to restore the Customer's property to its original condition after installation and repairs. This easement may be in such form as is required by the Utility.

The Customer agrees not to interfere with the Utility's employees in performing their duties. The Customer will not permit anyone except the Utility's employees to interfere with any of the equipment installed on the Customer's premises.

Commercial Applicants (Customers)

1. Please describe the commercial operations to be served.

2. Will these operations place unique, non-standard service demands upon the system or require any special facilities?

_____ No _____ Yes If yes, please describe:

The applicant has been shown a copy of the Utility's Texas Public Utility Commission approved Tariff and agrees to pay the rates in the Tariff and abide by the requirements in the Utility's Tariff and this Application.

WATER SERVICE AGREEMENT

The following are the terms of the service agreement between MSEC Enterprises, Inc. and _____ (the Customer).

I. PURPOSE.

The Utility owned and/or operated by MSEC Enterprises, Inc., doing business as Mid-South Synergy Water Resources, is responsible for protecting the drinking water supply from contamination or pollution which could result from improper private water distribution system construction or configuration. The purpose of this service agreement is to notify each customer of the restrictions which are in place to provide this protection. The Utility enforces these restrictions to ensure the public health and welfare. Each Customer must sign this agreement before MSEC Enterprises will begin service. In addition, when service to an existing connection has been suspended or terminated, the Utility will not re-establish service unless it has a signed copy of this agreement.

II. PLUMBING CODE.

The Utility adopts the International Plumbing Code pursuant to Texas Commission on Environmental Quality (TCEQ) Rule 290.46(i). The piping and other equipment on the premises furnished by the customer will be maintained by the customer at all times in conformity with the requirements of the International Plumbing Code and any other federal, state, and/or local regulations.

III. RESTRICTIONS. The following unacceptable practices are prohibited by State regulations.

A. No direct connection between the public drinking water supply and a potential source of contamination is permitted. Potential sources of contamination shall be isolated from the public water system by an air-gap or an appropriate backflow prevention device.

B. No cross-connection between the public drinking water supply and a private water system is permitted. These potential threats to the public drinking water supply shall be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone backflow prevention device.

C. No connection which allows water to be returned to the public drinking water supply is permitted.

D. No pipe or pipe fitting which contains more than 0.25% lead may be used for the installation or repair of plumbing at any connection which provides water for human use.

E. No solder or flux which contains more than 0.2% lead can be used for the installation or repair of plumbing at any connection which provides water for human use.

IV. TERMS.

A. The Utility will maintain a copy of this agreement as long as the Customer and/or the premises is connected to the Utility.

B. The Customer shall allow his/her property to be inspected for possible cross-connections and other potential contamination hazards. These inspections shall be conducted by the Utility or its designated agent prior to initiating new water service; when there is reason to believe that cross-connections or other potential contamination hazards exist; or after any major changes to the private water distribution facilities. The inspections shall be conducted during the Utility's normal business hours.

C. The Utility shall notify the Customer in writing of any cross-connection or other potential contamination hazard which has been identified during the initial inspection or the periodic reinspection.

D. The Customer shall immediately remove or adequately isolate any potential cross-connections or other potential contamination hazards on his premises.

E. The Customer shall, at his/her expense, properly install, test, and maintain any backflow prevention device required by the Utility. Copies of all testing (including annual retesting if required) and maintenance records shall be provided to the Utility.

V. ENFORCEMENT.

If the Customer fails to comply with the terms of the Service Agreement, the Utility may, at its option, either terminate service or properly install, test, and maintain an appropriate backflow prevention device at the service connection. Any expenses associate with the enforcement of this agreement shall be billed to the Customer and the Customer by signing this Agreement agrees to be bound by the terms of this Service Agreement and to pay all costs incurred by the Utility related to the installation of any backflow prevention devices.
